

BIOLOGY 346

MICROBIOLOGY LAB MANUAL

CONTENTS

How to Keep a Good Lab Notebook	Handout
Microscopy Introduction	Handout
Laboratory Safety	1-2
Ocular and Stage Micrometers	3-6
Simple Staining and Bacterial Morphology	7-9
Hanging Drop Technique	10-11
Differential Staining	12-17
Dilutions and Aseptic Technique	18-22
Media Preparation	23-27
Isolation of Pure Cultures	28-33
Bacterial Enumeration	34-40
Environmental Influences on Microbial Growth	41-46
Isolation of <i>Streptomyces</i> from Soil	47-49
Selective and Differential Media	50-52
Microbes of the Body: Gram-positive Cocci	53-57
Microbes of the Body: The Enterics	58-65
Multitest Identification Kits	66
Bacterial Genetics	67-69

Bactericidal Effects of Ultraviolet Radiation	70-71
Control of Microbial Growth: Disinfectants and Antiseptics	72-74
Control of Microbial Growth: Antibiotics	75-79
Snyder Test	80-81
Bacterial Examination of Water	82-85
Chromogenic Substrate Test	86-87
Food Microbiology	88-91

LABORATORY NOTEBOOK – POINT BREAKDOWN

EXERCISES	POSSIBLE POINTS
Microscopy; Simple Stains; Wet Mounts & Hanging Drop Slides	6
Differential Stains, Part I - Gram Stain	4
Differential Stains, Part II - Spore Stain & Capsule Stain	4
Dilutions; Aseptic Technique; Media Prep	4
Isolation of Pure Cultures	4
Bacterial Enumeration	6
Effect of Environmental Factors on Bacterial Growth	5
Isolation of <i>Streptomyces</i>	4
Selective and Differential Media	4
Biochemical Tools for Identification of Gram+ Bacteria	6
Biochemical Tools for Identification of Gram– Bacteria	6
Rapid ID Test Strips	5
Bacterial Genetics with pBAD	6
UV Radiation	4
Disinfectants & Antiseptics	4
Kirby-Bauer Test	4
Snyder Test	4
Water Analysis	5
Food Microbiology	<u>5</u>
TOTAL	90
