

Examples of Previous Student Topics for Evolutionary Biology BI432:

Evolution of Desert Rodents
Lifestyles of the Naked Mole-Rat
Evolution & Natural History of the Red Wolf
Evolution of the Preying Mantis
Evolution of Deep-Sea Hydrothermal Vent Communities
Human Evolution
Evolution of Cichlids in Lake Malawi
How Females choose their mates: Sexual Selection
Evolution of Hawaiian Flowering Plants
Origin and Evolution of HIV
Evolutionary History of the Teneric Family
The Impact of Continental Drift on Speciation
The Impact of Hatchery Raised Salmon on Wild Stocks
The Theory of Punctuated Equilibrium
Origins of Plant - Herbivore Biowarfare
Evolution of the Coelacanth (it's a fish)
Sexual Selection in Insects
The Impact of Habitat Fragmentation
The Black-footed Ferret
The Evolution of Trout
Behavioral Evolution of the Red Colobus Monkey
Tarweeds: Masters of Adaptive Radiation
Microbial Evolution by Natural Selection
Wild Horses of the Great Basin
The Evolution of the Domestic Dog
The Use of Plants by Early Humans

Great Journals to start your research reading found in our Library:

Trends in Ecology & Evolution (TREE)
Proceedings of the National Academy of Sciences (PNAS)
Science
Nature
PLoS Biology
PLoS One
