

TABLE OF CONTENTS

001

I	<u>Caenorhabditis Elegans and Mendel's second law revisited:</u>	5
	Symbol designation	5
	parental generation cross	7
	Expected outcome Testercross (unlinked)	11
	F1 self crosses (F2 generation expected)	13
	F2 (Self) Data - Raw	19-21
	Study questions, Mendel Revisited	17
	Chi Square test for F2 progeny	23
	progeny using F2 WT	29
	χ^2 test for WT genotypes	31
II	<u>Wisconsin Fast plants - Quantitative</u>	
	<u>Fruits of Brassica rapa</u>	33
	Flat Map	33
	A Fast plant tracking	37-38
	Qualitative phenotype measurements	41-45
	B Fast plant tracking continued	47
	F2 plant phenotypic measurements	47-48
	Class data (trichomb/height) phenotype class 49:	
	<u>C. Elegans Developmental Genetics</u>	51
	T + H cross data collection	55
	Genotypes of P, F1, F2 generations	59
	Initial strains used in Lab	51
	F2 plant phenotypic measur.	47-48
	<u>Transfer of genetic information in the Bacterium E. coli part 1:</u>	
	Parental/recombinant strains	61
	Appendix C dilution problems	63-65
	dilution plates created	69-71
